

Guarded cross-route comparison

Document control	Value
Route ID	cross-route-comparison
Revision	R1
Generated date	2026-08-30
Evidence IDs	animehacker-001dfad8c2aaaa7b748, animehacker-0043ac7f47ac35f9d99e, EVID-00aacf23b28a78f3b4cb, EVID-18be949bb5e1bf81201e, openvino-experimental-fork-016d9424a7c4, openvino-experimental-fork-0957a32a76e2, openvino-official-upstream-0957a32a76e2, openvino-official-upstream-0ec7e2a0bdff, EVID-004c0b4f19f867b05c27, EVID-007d654aa76d80d4b6ab

1. Title and document control

This controlled report compares five normalized routes without manufacturing a universal score.

DC-01 — Document identity

Field	Value
Report	Guarded cross-route comparison
Route ID	cross-route-comparison
Revision	R1
Canonical source	workbook/source/cross-route-comparison-final-report.md

2. Technical summary

The validated result is a bounded route comparison, not a league table. No universal ranking is supported.

RT-01 — Validated route-level conclusions

Route	Campaign	Attempts	Measurements	Quality records	Bounded conclusion
animehacker-tq3-0	wb-03-v1.5-2026-07-18	11	21	42	7 passed, 1 failed, 3 blocked; seven runnable terminal rows are complete and historical/rejected evidence remains outside formal statistics.
atomicbot-turboquant	wb-02-v1.7-2026-07-17	19	76	114	19 passed; runtime coverage is complete, while route-specific quality remains limited/provisional.
openvino-experimental-fork	fv6-2026-08-30	81	81	3888	27 passed, 54 artifact unavailable; performance and v3 objective quality are published only for passed configurations.
openvino-official-upstream	fv2-2026-08-30	45	45	2160	15 passed, 5 failed, 25 blocked; conversion failures and hardware-preflight blocks have no fabricated measurements.
upstream-llama-cpp	wb-01-v1.4-2026-07-16	13	80	54	13 passed; UL-08 is only the best observed CPU route, UL-10 only the best observed Intel GPU route, and UL-05 only the recorded fallback.

3. Key findings and decision-relevant evidence

Availability and complete attempt accounting precede any performance comparison.

Note: Incompatible quality scores are not ranked. Descriptive side-by-side evidence retains its original methodology.

4. Repository, branch, commit, build, hardware, and software identity

Repository, hardware, and software identities remain in each route package and its hashed evidence index.

ID-01 — Route identity index

Route	Campaign	Repository metadata	Hardware metadata	Software metadata

5. Objectives, scope, test matrix, and execution sequence

The gate evaluates route-wide protocol signatures and does not pair values across unmatched configurations.

CP-01 — Comparability decision matrix

Left route	Right route	Metric	Classification	Matched	Left only	Right only	Reason summary
animehacker-tq3-0	atomicbot-turboquant	generation_tokens_per_second	not_comparable	0	7	19	no_matched_case_ids
animehacker-tq3-0	atomicbot-turboquant	quality	descriptive_only	0	7	19	no_matched_case_ids; +3 more (see catalog CSV)
animehacker-tq3-0	openvino-experimental-fork	generation_tokens_per_second	not_comparable	0	7	27	no_matched_case_ids
animehacker-tq3-0	openvino-experimental-fork	quality	descriptive_only	0	7	27	no_matched_case_ids; +8 more (see catalog CSV)
animehacker-tq3-0	openvino-official-upstream	generation_tokens_per_second	not_comparable	0	7	15	no_matched_case_ids

Left route	Right route	Metric	Classification	Matched	Left only	Right only	Reason summary
animehacker-tq3-0	openvino-official-upstream	quality	descriptive_only	0	7	15	no_matched_case_ids; +8 more (see catalog CSV)
animehacker-tq3-0	upstream-llama-cpp	generation_tokens_per_second	not_comparable	0	7	13	no_matched_case_ids
animehacker-tq3-0	upstream-llama-cpp	quality	descriptive_only	0	7	13	no_matched_case_ids; +4 more (see catalog CSV)
atomicbot-turboquant	openvino-experimental-fork	generation_tokens_per_second	not_comparable	0	19	27	no_matched_case_ids
atomicbot-turboquant	openvino-experimental-fork	quality	descriptive_only	0	19	27	no_matched_case_ids; +8 more (see catalog CSV)
atomicbot-turboquant	openvino-official-upstream	generation_tokens_per_second	not_comparable	0	19	15	no_matched_case_ids
atomicbot-turboquant	openvino-official-upstream	quality	descriptive_only	0	19	15	no_matched_case_ids; +8 more (see catalog CSV)
atomicbot-turboquant	upstream-llama-cpp	generation_tokens_per_second	not_comparable	0	19	13	no_matched_case_ids
atomicbot-turboquant	upstream-llama-cpp	quality	descriptive_only	0	19	13	no_matched_case_ids; +3 more (see catalog CSV)
openvino-experimental-fork	openvino-official-upstream	generation_tokens_per_second	direct	15	12	0	all_required_dimensions_match
openvino-experimental-fork	openvino-official-upstream	quality	direct	15	12	0	all_required_dimensions_match
openvino-experimental-fork	upstream-llama-cpp	generation_tokens_per_second	not_comparable	0	27	13	no_matched_case_ids
openvino-experimental-fork	upstream-llama-cpp	quality	descriptive_only	0	27	13	no_matched_case_ids; +8 more (see catalog CSV)
openvino-official-upstream	upstream-llama-cpp	generation_tokens_per_second	not_comparable	0	15	13	no_matched_case_ids
openvino-official-upstream	upstream-llama-cpp	quality	descriptive_only	0	15	13	no_matched_case_ids; +8 more (see catalog CSV)

Direct still requires consumers to match individual model/configuration rows.

Complete machine-readable reason codes, details, case IDs, and signature mismatches are retained in the comparability catalog CSV.

6. Model, weight, cache-format, and backend availability

Passed, failed, blocked, unavailable, and other explicit statuses remain visible; absence is never zero.

SS-01 — Status totals by route

Route	Status	Count
animehacker-tq3-0	Passed	7
animehacker-tq3-0	Failed	1
animehacker-tq3-0	Blocked	3
atomicbot-turboquant	Passed	19
openvino-experimental-fork	Passed	27
openvino-experimental-fork	Artifact unavailable	54
openvino-official-upstream	Passed	15
openvino-official-upstream	Failed	5
openvino-official-upstream	Blocked	25
upstream-llama-cpp	Passed	13

7. Complete attempt accounting

This is the complete cross-route attempt ledger, including every non-passed terminal outcome.

ST-01 — Complete attempt accounting

Route	Campaign	Test case	Attempt	Status	Executed	Reason
animehacker-tq3-0	wb-03-v1.5-2026-07-18	AH-01	AH-01--terminal	Passed	true	Passed observation
animehacker-tq3-0	wb-03-v1.5-2026-07-18	AH-02	AH-02--terminal	Passed	true	Passed observation
animehacker-tq3-0	wb-03-v1.5-2026-07-18	AH-03	AH-03--terminal	Passed	true	Passed observation
animehacker-tq3-0	wb-03-v1.5-2026-07-18	AH-04	AH-04--terminal	Passed	true	Passed observation
animehacker-tq3-0	wb-03-v1.5-2026-07-18	AH-05	AH-05--terminal	Passed	true	Passed observation
animehacker-tq3-0	wb-03-v1.5-2026-07-18	AH-06	AH-06--terminal	Blocked	false	Safety prerequisite blocked inference before a request; classification resolved with cleanup evidence
animehacker-tq3-0	wb-03-v1.5-2026-07-18	AH-07	AH-07--terminal	Blocked	false	Safety prerequisite blocked inference before a request; classification resolved with cleanup evidence
animehacker-tq3-0	wb-03-v1.5-2026-07-18	AH-08	AH-08--terminal	Passed	true	Passed observation
animehacker-tq3-0	wb-03-v1.5-2026-07-18	AH-09	AH-09--terminal	Passed	true	Passed observation

8. Performance results and repetition detail

Throughput is direct only where model, input length, output length, backend class, repetition treatment, and metric definition match.

TP-01 — Throughput comparison boundaries

Left route	Right route	Classification	Reason codes
animehacker-tq3-0	atomicbot-turboquant	not_comparable	["no_matched_case_ids"]
animehacker-tq3-0	openvino-experimental-fork	not_comparable	["no_matched_case_ids"]

atomicbot-turboquant	openvino-official-upstream	not_comparable	["no_matched_case_ids"]
atomicbot-turboquant	upstream-llama-cpp	not_comparable	["no_matched_case_ids"]
openvino-experimental-fork	openvino-official-upstream	direct	["all_required_dimensions_match"]
openvino-experimental-fork	upstream-llama-cpp	not_comparable	["no_matched_case_ids"]
openvino-official-upstream	upstream-llama-cpp	not_comparable	["no_matched_case_ids"]

9. Quality methodology and results

Quality ranking additionally requires the identical prompt set, prompt-suite identity, rubric, scoring version, denominator, and aggregation.

QM-01 — Quality methodology boundaries

Route	Prompt set	Prompt suite	Rubric	Scoring version	Denominator set
animehacker-tq3-0	P1, P2, P3, P4, P5, P6	GTQ-PROMPTS-v1	GTQ-QUALITY-RUBRIC-v1	historical-harsh-content-adjudication	60.0
atomicbot-turboquant	P1, P2, P3, P4, P5, P6	GTQ-PROMPTS-v1	GTQ-QUALITY-RUBRIC-v1	v1-recomputed-and-evidence-bound; application limited/provisional	60.0
openvino-experimental-fork	Q01, Q02, Q03, Q04, Q05, Q06, Q07, Q08, Q09, Q10, Q11, Q12, Q13, Q14, Q15, Q16, Q17, Q18, Q19, Q20, Q21, Q22, Q23, Q24, Q25, Q26, Q27, Q28, Q29, Q30, Q31, Q32, Q33, Q34, Q35, Q36, Q37, Q38, Q39, Q40, Q41, Q42, Q43, Q44, Q45, Q46, Q47, Q48	OPENVINO-SECTOR-EXPERIENCE-QUALITY-v3	objective-quality-weighted-5-3-2-output-health-gate	experimental-openvino-objective-quality/v2	480.0
openvino-official-upstream	Q01, Q02, Q03, Q04, Q05, Q06, Q07, Q08, Q09, Q10, Q11, Q12, Q13, Q14, Q15, Q16, Q17, Q18, Q19, Q20, Q21, Q22, Q23, Q24, Q25, Q26, Q27, Q28, Q29, Q30, Q31, Q32, Q33, Q34, Q35, Q36, Q37, Q38, Q39, Q40, Q41, Q42, Q43, Q44, Q45, Q46, Q47, Q48	OPENVINO-SECTOR-EXPERIENCE-QUALITY-v3	objective-quality-weighted-5-3-2-output-health-gate	experimental-openvino-objective-quality/v2	480.0
upstream-llama-cpp	P1, P2, P3, P4, P5, P6	GTQ-PROMPTS-v1	GTQ-QUALITY-RUBRIC-v1	WB-01-v1.4-conservative-format-caps	40.0, 60.0

Note: OpenVINO v3 and legacy llama quality evidence are descriptive only; incompatible quality scores are not ranked.

10. Device/backend use and fallback verification

Backend class is a required gate dimension. Recorded backend identity is not proof of device utilization beyond each route's own evidence.

11. Failures, blocks, deviations, and recovery attempts

Failed, blocked, unavailable, rejected, and historical outcomes remain in their route ledgers and collection catalogs.

FL-01 — Non-passed status accounting

Route	Status	Count
animehacker-tq3-0	Failed	1
animehacker-tq3-0	Blocked	3
openvino-experimental-fork	Artifact unavailable	54
openvino-official-upstream	Failed	5
openvino-official-upstream	Blocked	25

12. Limitations, uncertainty, robustness checks, and claim boundaries

No universal best repository, universal best route, or combined quality/performance score is produced. Route extrema remain route-local observations.

Note: A direct protocol classification permits matched-row comparison only; it does not establish causal superiority or deployment safety.

13. Reproduction guidance

Regeneration consumes the five existing normalized RouteBundle objects and does not rerun benchmarks.

RE-01 — Reproduction outputs

Item	Repository-relative path
Canonical report	docs/testing/final-results/06-cross-route-comparison/workbook/source/cross-route-comparison-final-report.md
Comparability matrix	docs/testing/final-results/06-cross-route-comparison/results/comparability-matrix.csv
Collection catalogs	docs/testing/final-results/catalog/

14. Evidence index and hashes

Each route package retains its complete evidence index and checksum manifest; the cross-route claim map points back to those route authorities.

EV-01 — Route evidence coverage

Route	Evidence records	Selected report evidence IDs
animehacker-tq3-0	742	animehacker-001dfad8c2aaeea7b748, animehacker-0043ac7f47ac35f9d99e
